

Command on Demand™

“just click-n-run”

Command Software Systems' Command On Demand™ is an On-Demand Virus scanner that provides a quick and easy checkup, or a second opinion for computer users with Internet access. There is nothing for the end-user to install, configure or maintain just Click and Run! Command On Demand™ is the only product on the market that offers you a totally portable and scalable solution to meet your unique needs and goals. Install it on your web site and it immediately becomes sticky. Visitors will turn up more often and stay longer because of the scanning. It is available to everyone with access to your site. Command will continually provide you with the latest virus protection to help your users and customers identify and repair past, current and newly found malicious viruses, Trojans and worms. All Command AntiVirus software comes with the legendary F-Prot Professional, famous for it's best-of-breed speed, detection and disinfection. Because of this flexibility, Command On Demand™ can be used in the following applications:

Corporate Model

Corporations are constantly looking for more solutions to the all-pervasive Virus problem. It is commonly accepted practice to have more than one AntiVirus program protecting your information assets. With the Command On Demand button in place, there is nothing to configure, install or maintain. Command on Demand is always up to date with the latest antivirus definitions and scan engine. No need for an update - users just click and run with no loss of productivity.

Advertising Model

Advertisers are continually looking for new mediums to expand their market presence and messaging. Traditional print, TV and Radio advertising has dramatically expanded into the Internet. Tens of millions of businesses, students and consumers use the web every day in search of content, commerce, and community. Web site Banner Advertising has become as commonplace as TV and print advertising. Command on Demand™ is the perfect new vehicle to provide an extremely valuable service as well as an advertising mechanism. The typical virus scan takes between a minute and several minutes, depending on the number of files stored and scanned. Most users will wait and watch the scan in action, which is the perfect time to present useful and interesting marketing messages, promotions and advertisements. Command on Demand™ could be provided free of charge to your customers, with the understanding that you will be using the scan as a marketing vehicle for your products or services.
